Biography I want to join the board of Ferry Brook range to maintain the club and to make positive changes where needed

I see things about Ferry Brook Range I love and some things that can clearly use improvement. To make any changes whatsoever an organization needs committed members and officers. Having attended meetings as a member I have observed areas where I feel can contribute to range operations in a positive way. I can bring that commitment.

I am from a city very unfriendly to gun ownership and that has helped me to recognize how special this place is

Having lived in a gun restrictive city very few places to shoot, I recognize how fragile the right to own a gun really is. And without a place to shoot one and gain competency of what value is that ownership? Ferry Brook is where I, and my family, have learned to shoot, I appreciate this, and I want our club to continue forever.

I really love this club

It's the greatest place. I like the people I have met, I like the facility, and I like the different shooting sports on offer. Ferry Brook is like a candy store. So much to try and so much opportunity here. In the few years that I have been a member I have tried shooting 600 yard high power, trap, cowboy action, and action pistol. In the interests of not spreading myself too thin my focus is now is pistol competition and Steel Challenge.

I volunteer a lot of time at Ferry Brook as a member

Most Saturdays I can be found during membership hours taking new members on facility tours, explaining the procedures of our range and performing indoor range qualifications for members who have opted to add on that privilege to their membership. I am also heavily involved in the monthly matches for both USPSA and Steel Challenge disciplines and can usually be found either building props, setting up, tearing down, or acting as a Range Officer guiding competitors through the matches.

How long have I been at Ferry Brook

I received my first membership card in 2023.
